

Susan N. Chi, MD
Clinical Director, Pediatric Neuro-Oncology Program
Attending Physician in Pediatric Hematology/Oncology
Dana-Farber/Boston Children's Cancer and Blood Disorders Center
Associate Professor of Pediatrics, Harvard Medical School
Boston, MA 02215

Dr. Susan Chi is an internationally recognized expert in pediatric neuro-oncology. Dr. Chi joined the pediatric neuro-oncology program at Dana-Farber Cancer Institute/ Boston Children's Hospital in 2003 and now serves as the Clinical Director of Pediatric Neuro-Oncology. Her major academic interests lie in rare brain tumors, with expertise in brain cancers such as atypical teratoid rhabdoid tumor (ATRT), embryonal tumor with multi-layered rosettes (ETMR) and other infant brain tumors. She is the principal investigator in multiple national and international clinical trials in collaboration with larger multi-center consortia, specifically exploring novel strategies to treat children with malignant brain tumors and she has launched the Infant Brain Tumor Program at DF/BCH dedicated to all aspects of clinical care and research for the youngest population of children.
